Wallawaththa,
Colombo 06.

STRUCTURAL ENGINEER'S OBSERVATION REPORT FOR THE EXISTING BUILDING

This is to inform you that I, Eng. M.C.R. Kumara visited the functioning building for Royal Hospital (Pvt) LTD, No:62, W.A.Silva Mawatha, Wallawatta, Colombo 06. The purpose of the visit is to evaluate visually the quality and structural integrity of the building and specially inspected the columns, beams and slabs and guide a suitable rectification method if required.

- There are no structural cracks visually seen on beams walls or in foundations.
- There is no noticeable settlement occurred in the building at ground floor level and no visible cracks on the floor.

As per the received information from you, the existing building constructed some years back as per the practicing standards and methods available in particular time in Sri Lanka. Also, it has been fully occupied for past years and still it is functioning without any structural failures. Therefore, considering all above facts, the building is structurally stable and safe for human habitation.

Eng M.C.R.Kumara
