

18<sup>th</sup> October 2021

**Condition report of the buildings of the Cooperative Hospital at Gampaha**

On the request of the General Manager of the above hospital, I have visited the above premises on 15<sup>th</sup> October 2021 and inspected the each and every building.

Out of five buildings one is being used as administrative office and the pharmacy.

Construction duration and the completion dates are different to each other. One building had been completed even before 1996.

I could certify that all the buildings are structurally sound enough to function the hospital activities as they are being used at present.
