11th October 2019

Director – Operations
Asiri Central Hospital
No.114, Norris Canal Road
Colombo 10

Dear Sir,

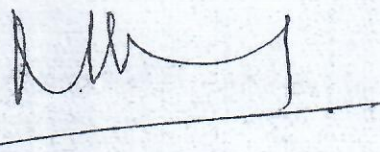

THE ASIRI CENTRAL HOSPITAL
No.114, NORRIS CANAL ROAD, COLOMBO 10

As per the request I have inspected the building on the 10th October 2019.

The construction of the 15 story building has been completed in the beginning of the year 2010 and functioning as a hospital since 1st April 2010, as per information gathered from the Officials of the Asiri Central Hospital.

The building consists of a basement, ground floor and thirteen upper levels, with parking at basement, first and second floors, reception and ETU at ground floor, hospital wards, rooms, channeling center, laboratories and theatres from third to twelfth floor and offices at thirteenth floor. Part of the roof is a concrete slab with many equipment installed, lift machine rooms and water tanks and balance area is a steel roof with trusses across the landscaped cafeteria area at third floor. Around the building are access ramps in front and driveways in other areas at ground floor.

The building is maintained satisfactorily throughout from the day of completion of construction and no defects are observed during the inspection. The building is structurally stable and safe for human habitation.

Laksiri Cooray
